

HVAC System Solutions

ROOF TOP UNIT MAT-012

1. Really powerful cooling comfort, higher efficiency, light weight;
2. More stable working, good noise level;
3. Sleek shroud design reduces drag;
4. Suitable for a standard 360mm*360mm vent opening;
5. With non-zone depleting refrigerant R410a;
6. Axial fan produces big air volume to cool down the condenser;
7. The upper unit can be matched with the air distribution box or duct;
8. ACRG distribution box with fully adjustable louvers and blower speeds provide just right cooling comfort;
9. Removable and washable filter to keep interior clean;
10. HP(heat pump) or PTC electric heater optional;

Cooling Capacity	3800W
Heating Capacity	3800W
Alternative electric heater	1500W
Refrigerant	R410A
Compressor	LG
Input Power	1450W
Current	5.8A (220V)
Power Supply	220~240V/50Hz/1Ph & 110V, 60HZ
Inner frame material	EPP(Expanded polypropylene)
Upper Unit Sizes(L*W*H)	788*632*256 mm
Net Weight	28KG
