

HVAC System Solutions

ROOF TOP UNIT MAT-015

1. Really powerful cooling comfort, higher efficiency, light weight;
2. More stable working, good noise level;
3. Sleek shroud design reduces drag;
4. With non-zone depleting refrigerant R410a;
5. Axial fan produces big air volume to cool down the condenser;
6. The upper unit can be matched with the air distribution box or duct;
7. ACRG distribution box with fully adjustable louvers and blower speeds provide just right cooling comfort;
8. Removable and washable filter to keep interior clean;
9. HP(heat pump) or PTC electric heater optional;

Cooling Capacity	4500W/15300BTU
Alternative electric heater	2000W
Refrigerant	R410A
Compressor	Mitsubishi
Input Power	1450W
Current	5.8A (220V)
Power Supply	220~240V/50Hz/60Hz, 110V/60HZ 1Ph
Upper Unit Sizes(L*W*H)	890*760*335 mm
Net Weight	39KG
